INDEX TO VOLUME XLVI.

ACID bacteria, lactic, relation to corn silage, 319
——, hippuric, in animal organism, studies on synthesis, 73
——, ——, in the rabbit after exclusion of bile from the intestine, note on the synthesis, 73
——, hydrocyanic, in plants, note on formation, 297
——, inosite hexaphosphoric, synthesis, 453
——, uric, some salts of, preparation and properties, 599
Acid-base exchange between plasma and red blood cells, 61
Acidity of goat's milk in terms of hydrogen ion concentration with comparisons to that of cow's and human milk, 129
Acids, amino-, in nutrition, 443
——, basic amino-, of glycinin, globulin of the soy bean, *Soja hispida*, as determined by Van Slyke's method, 459
——, fatty, of lecithin of egg yolk, 193
——, *d*-ribohexosaminic, 19
Age, effect on pancreatic enzymes, 431
Alfalfa, pecans, peanuts, and kafir, nitrogen distribution of the proteins extracted by dilute alkali from, 437
Alkali, dilute, nitrogen distribution of proteins extracted from pecans, peanuts, kafir, and alfalfa by, 437
—— reserve of the blood of certain lower vertebrates, 57
Alkalimetric titration, determination of inorganic phosphate in urine by, 285
Alkylamines, volatile, in the presence of ammonia and of volatile tertiary alkylamines in the presence of volatile primary and secondary alkylamines, detection, 1
ALLEN, BERNICE. See SHERMAN, ROUSE, ALLEN, and WOODS, 503
Alloy, Devarda's, and Scales' method for reducing nitric nitrogen, comparative results with, 53
ALSBERG, C. L. See WOODWARD and ALSBERG, 1
Amino-acids, basic, of glycinin, globulin of the soy bean, *Soja hispida*, as determined by Van Slyke's method, 459
—— in nutrition, 443
Ammonia, detection of volatile alkylamines in the presence, 1
Anaerobic respiration in some pelecypod mollusks, 579
—— ——, relation to glycogen, 579
Analysis, protein, a note on a modification of the Van Slyke method, 351
ANDERSON, J. A. See FRED, PETERSON, and ANDERSON, 319
Antiscorbutic potency of milk powder, 309
—— vitamine and its behavior to various treatments, some observations on the stability, 367
AUSTIN, J. HAROLD, STILLMAN, EDGAR, and VAN SLYKE, DONALD D. Factors governing the excretion rate of urea, 91

BACTERIA, lactic acid, relation to corn silage, 319
Basal metabolism in men, variation and statistical constants, 257
Base, acid-, exchange between plasma and red blood cells, 61
Bean, soy, *Soja hispida*, basic amino-acids of glycinin, globulin of, as determined by Van Slyke's method, 459
BENEDICT, F. G. See HARRIS and BENEDICT, 257
BERKELEY, C. Anaerobic respiration in some pelecypod mollusks. The relation of anaerobic respiration to glycogen, 579
Bicarbonate, blood and lymph, comparison after intravenous injection of sodium bicarbonate, 499
—— levels, blood, following administration of sodium bicarbonate, 493
——, sodium, blood bicarbonate levels following administration, 493
——, ——, intravenous injection of, comparison of blood and lymph bicarbonate after, 499
Bile, exclusion of, from the intestine of the rabbit, note on the synthesis of hippuric acid after, 73
Biochemistry of iodine, contributions, 35
Bios of Wildiers and cultivation of yeast, 521, 525
Blood, alkali reserve of, in certain lower vertebrates, 57
—— and lymph bicarbonate, comparison after intravenous injection of sodium bicarbonate, 499
—— —— milk after ingestion of sodium chloride, a study of chlorine content, 483
—— —— urine of the hibernating frog, *Rana virescens* Kalm. (*pipiens* Gm.), composition, 421
Blood as a physicochemical system, 411
—— bicarbonate levels following administration of sodium bicarbonate, 493
—— cells, red, and plasma, acid-base exchange between, 61
——, certain chemical changes in, after pyloric obstruction in dogs, 223
——, coagulation, action of tissue extracts in, 167
—— sugar regulation and the origin of the hyperglycemias, 381, 391, 403
Brain lecithin, 353
BREWSTER, JOSEPH F. The use of edestin in determining the proteolytic activity of pepsin, 119

CAMERON, A. T., and CARMICHAEL, J. Contributions to the biochemistry of iodine. IV. The effect of thyroxin on growth in white rats and in rabbits, 35
Cane-sugar, inversion and determination, 529
Carbohydrate(s), available in thrice boiled vegetables, 83
—— in vegetable foods, determination, 537
CARMICHAEL, J. See CAMERON and CARMICHAEL, 35
Carotinoids, plant, relation to growth and reproduction of albino rats, 559
Cells, red blood, and plasma, acid-base exchange between, 61
CESSNA, RUTH. See NELSON, FULMER, and CESSNA, 77
CHANDLER, L. R. See SCHULTZ and CHANDLER, 129, 133
Chemical changes in blood after pyloric obstruction in dogs, 223
—— nature of tissue coagulins, 135
Chemistry of neoarsphenamine and its relation to toxicity, 209

Chloride, sodium, a study of chlorine content of the milk and blood after ingestion, 483

Chlorine content of milk and blood after ingestion of sodium chloride, a study, 483

CLARK, E. P. See LEVENE and CLARK, 19

Coagulation of blood, action of tissue extracts in, 167

Coagulins, tissue, chemical nature, 135

COLLIP, J. B. The alkali reserve of the blood of certain of the lower vertebrates, 57

——. The acid-base exchange between the plasma and the red blood cells, 61

Colorimetric method for determining hydrogen ion concentration of small amounts of fluid, 299

Corn silage, relation of lactic acid bacteria to, 319

CROLL, HILDA M. See MYERS and CROLL, 537

CURTMAN, L. J., and HART, D. The preparation and properties of some salts of uric acid, 599

DENIS, W., and SISSON, WARREN R. A study of the chlorine content of milk and blood after the ingestion of sodium chloride, 483

Determination and inversion of cane-sugar, 529

——, direct quantitative, of sodium in small amounts of serum, simple method for, 467

—— of the basic amino-acids of glycinin, globulin of the soy bean, *Soja hispida*, by Van Slyke's method, 459

—— —— carbohydrates in vegetable foods, 537

Determination of the hydrogen ion concentration of small amounts of fluid, colorimetric method for, 299

—— —— inorganic phosphate in urine by alkalimetric titration, 285

—— —— proteolytic activity of pepsin, use of edestin in, 119

——, quantitative, of potassium in small amounts of serum, a clinical method for, 339

Devarda's alloy and Scales' method for reducing nitric nitrogen, comparative results with, 53

Diastases, liver, conditions of action, 391

Digestibility of phaseolin, effect of cooking proteins on, 9

—— —— proteins *in vitro*, studies on, 9

DOWELL, C. T., and MENAUL, PAUL. Nitrogen distribution of the proteins extracted by dilute alkali from pecans, peanuts, kafir, and alfalfa, 437

EDESTIN, use in determining proteolytic activity of pepsin, 119

Egg yolk, lecithin of, fatty acids, 193

Electrode vessel, hydrogen, adapted for titrations, 463

Elimination, nitrogen, rate, 475

ELLIS, N. R., STEENBOCK, H., and HART, E. B. Some observations on the stability of the antiscorbutic vitamine and its behavior to various treatments, 367

——. See HART, STEENBOCK, and ELLIS, 309

Enzymes, pancreatic, effect of age on, 431

Excretion rate of urea, factors governing, 91
Extracts, tissue, action in coagulation of blood, 167
Eunuch, metabolism, 281

FALKOV, M. See RAIZISS and FALKOV, 209
Fat globules in goat's milk, size, 133
Fatty acids of lecithin of egg yolk, 193
FELTON, LLOYD D. A colorimetric method for determining the hydrogen ion concentration of small amounts of fluid, 299
FENGER, FREDERIC, and HULL, MARY. The effect of age on pancreatic enzymes, 431
FISKE, CYRUS H. The determination of inorganic phosphate in urine by alkalimetric titration, 285
Fluid, colorimetric method for determining the hydrogen ion concentration of small amounts, 299
Food supply, simplified, growth and reproduction upon, 503
——, vegetable, determination of carbohydrates in, 537
FRED, E. B., PETERSON, W. H., and ANDERSON, J. A. The relation of lactic acid bacteria to corn silage, 319
——. See PETERSON, FRED, and VERHULST, 329
FULMER, ELLIS I. See NELSON, FULMER, and CESSNA, 77

GALACTONIC lactone, on the preparation, 307
Globules, fat, in goat's milk, size, 133
Globulin of the soy bean, *Soja hispida*, glycinin, basic amino-acids of, as determined by Van Slyke's method, 459
Glycinin, basic amino-acids of, globulin of the soy bean, *Soja hispida*, as determined by Van Slyke's method, 459
Glycogen formation and glycogenolysis, 381
——, relation of anaerobic respiration to, 579
Glycogenolysis and glycogen formation, 381
Growth and reproduction of albino rats, relation of plant carotinoids to, 559
—— —— —— upon simplified food supply, 503
—— in white rats and in rabbits, effect of thyroxin on, 35
——, yeast, and vitamines, 113
Growth-limiting factor, proline, in proteins of peas (*Vicia sativa*), 443

HARRIS, J. ARTHUR, and BENEDICT, F. G. The variation and the statistical constants of basal metabolism in men, 257
HARRISON, ARTHUR P. Comparative results with Scales' method and Devarda's alloy for reducing nitric nitrogen, 53
HART, D. See CURTMAN and HART, 599
HART, E. B., STEENBOCK, H., and ELLIS, N. R. Antiscorbutic potency of milk powder, 309
——. See ELLIS, STEENBOCK, and HART, 367
HASTINGS, A. BAIRD. A hydrogen electrode vessel adapted for titrations, 463
—— and MURRAY, H. A., JR. Observations on parathyroidectomized dogs, 233
——, MURRAY, C. D., and MURRAY, H. A., JR. Certain chemical changes in the blood after pyloric obstruction in dogs, 223

HENDERSON, L. J. Blood as a physicochemical system, 411
Hexaphosphoric acid, inosite, synthesis, 453
Hippuric acid in animal organism, studies on synthesis, 73
—— —— in the rabbit after exclusion of bile from the intestine, note on the synthesis, 73
HULL, MARY. See FENGER and HULL, 431
Hydrocyanic acid in plants, note on formation, 297
Hydrogen electrode vessel adapted for titrations, 463
—— ion concentration, acidity of goat's milk in terms of, with comparisons to that of cow's and human milk, 129
—— —— —— of small amounts of fluid, colorimetric method for determining, 299
Hyperglycemias, origin of, and blood sugar regulation, 381, 391, 403

IDE, M. The "bios" of Wildiers and the cultivation of yeast, 521
Injection, intravenous, of sodium bicarbonate, comparison of blood and lymph bicarbonate after, 499
Inorganic phosphate in urine, determination of, by alkalimetric titration, 285
Inosite hexaphosphoric acid, synthesis, 453
Intestine, rabbit, bile excluded from, note on the synthesis of hippuric acid after, 73
Intravenous injection of sodium bicarbonate, comparison of blood and lymph bicarbonate after, 499
In vitro, digestibility of proteins, studies on, 9
Iodine, biochemistry of, contributions, 35

JOHNS, CARL O. See WATERMAN and JOHNS, 9
JONES, D. BREESE, and WATERMAN, HENRY C. The basic amino-acids of glycinin, the globulin of the soy bean, *Soja hispida*, as determined by Van Slyke's method, 459

KAFIR, pecans, peanuts, and alfalfa, nitrogen distribution of the proteins extracted by dilute alkali from, 437
KENNEDY, CORNELIA. See PALMER and KENNEDY, 559
KHOROZIAN, KRIKOR G. See ROCKWOOD and KHOROZIAN, 553
KRAMER, BENJAMIN, and TISDALL, FREDERICK F. A clinical method for the quantitative determination of potassium in small amounts of serum, 339
—— and ——. A simple method for the direct quantitative determination of sodium in small amounts of serum, 467

LACTIC acid bacteria, relation to corn silage, 319
Lactone, galactonic, on the preparation, 307
LANGFELDT, EINAR. Blood sugar regulation and the origin of the hyperglycemias. I. Glycogen formation and glycogenolysis, 381
——. II. Conditions of action of liver diastases, 391
——. III. Theory, 403
Lecithin of egg yolk, fatty acids, 193
—— —— the brain, 353
LEVENE, P. A., and CLARK, E. P. *d*-Ribohexosaminic acids, 19

LEVENE, P. A., and MEYER, G. M. On the preparation of galactonic lactone, 307
—— and ROLF, IDA P. Lecithin. III. Fatty acids of lecithin of the egg yolk, 193
—— and ——. IV. Lecithin of the brain, 353
LEWIS, HOWARD B. Studies on the synthesis of hippuric acid in the animal organism. IV. A note on the synthesis of hippuric acid in the rabbit after exclusion of bile from the intestine, 73
Liver diastases, conditions of action, 391
Lymph and blood bicarbonate, comparison after intravenous injection of sodium bicarbonate, 499

MACDONALD, MARGARET B., and MCCOLLUM, E. V. The "bios" of Wildiers and the cultivation of yeast, 525
MCCABE, EDITH H. See O'REILLY and MCCABE, 83
MCCOLLUM, E. V. See MACDONALD and MCCOLLUM, 525
MCELLROY, W. S., and POLLOCK, H. O. On the rate of nitrogen elimination, 475
MENAUL, PAUL. Note on the formation of hydrocyanic acid in plants, 297
——. A note on a modification of the Van Slyke method of protein analysis, 351
——. See DOWELL and MENAUL, 437
Metabolism, basal, in men, variation and statistical constants, 257
—— of the eunuch, 281
Method, clinical, for quantitative determination of potassium in small amounts of serum, 339
Method, colorimetric, for determining the hydrogen ion concentration of small amounts of fluid, 299
—— of protein analysis, Van Slyke, note on a modification, 351
——, Scales', and Devarda's alloy for reducing nitric nitrogen, comparative results with, 53
——, simple, for direct quantitative determination of sodium in small amounts of serum, 467
——, Van Slyke's, used in determining basic amino-acids of glycinin, the globulin of the soy bean, *Soja hispida*, 459
MEYER, G. M. See LEVENE and MEYER, 307
Milk and blood after ingestion of sodium chloride, a study of chlorine content, 483
——, cow's and human, acidity of goat's milk in terms of hydrogen ion concentration with comparisons to, 129
——, goat's, acidity of, in terms of hydrogen ion concentration with comparisons to that of cow's and human milk, 129
——, ——, size of fat globules in, 133
——, human and cow's, acidity of goat's milk in terms of hydrogen ion concentration with comparisons to, 129
—— powder, antiscorbutic potency, 309
MILLS, C. A. The action of tissue extracts in the coagulation of blood. 167
——. Chemical nature of tissue coagulins, 135
Mollusks, pelecypod, anaerobic respiration in some, 579
MURRAY, C. D. See HASTINGS, MURRAY, and MURRAY, 223
MURRAY, H. A., JR. See HASTINGS and MURRAY, 233

MURRAY, H. A., JR. See HASTINGS, MURRAY, and MURRAY, 223

MYERS, VICTOR C., and CROLL, HILDA M. The determination of carbohydrates in vegetable foods, 537

NELSON, V. E., FULMER, ELLIS I., and CESSNA, RUTH. The nutritional requirements of yeast. III. The synthesis of water-soluble B by yeast, 77

Neoarsphenamine, chemistry of, and its relation to toxicity, 209

Nitric nitrogen, comparative results with Scales' method and Devarda's alloy for reducing, 53

Nitrogen distribution of the proteins extracted by dilute alkali from pecans, peanuts, kafir, and alfalfa, 437

—— elimination, rate, 475

——, nitric, comparative results with Scales' method and Devarda's alloy for reducing, 53

Nucleus in zein responsible for supplementing the proteins of peas (*Vicia sativa*), 443

Nutrition, amino-acids in, 443

Nutritional requirements of yeast, 77

OBSTRUCTION, pyloric, in dogs, certain chemical changes in blood after, 223

O'REILLY, LORETTO, and MCCABE, EDITH H. The available carbohydrate in thrice boiled vegetables, 83

Organic regulation, studies on, 421

Organism, animal, studies on synthesis of hippuric acid in, 73
